

Abstract of the Disclosure

Compositions and methods for enhancing paracellular permeability at  
an absorption site in a subject are disclosed. The method includes: (a)  
administering an effective amount of a phospholipase C inhibitor to a subject  
5 at a time in which enhanced paracellular permeability is desired; and (b)  
<sup>2</sup> enhancing paracellular permeability in the subject at the absorption site  
through the administering of the effective amount of the phospholipase C  
inhibitor. The disclosed compositions and methods provide enhanced  
absorption of a hydrophilic drug in a subject.
